RFQ Response

1 Cover Letter & Executive Summary

To: The Owner / Management, Evana Fresh — Jeddah, Saudi Arabia

Subject: Response to your Request for Quotation, Demo & Technical Proposal for an ERP + Integrated POS Solution

Dear Sir/Madam,

Thank you for the opportunity to respond to your requirement. We have carefully reviewed every item in your request, and we are pleased to confirm that our integrated ERP + POS platform **covers all of the functionality you listed** — across sales, inventory, reordering, expiry, customer & supplier dues, purchasing, accounting, reporting, multi-branch and cloud/mobile access.

Our solution is designed precisely for a growing multi-store grocery business like yours: the **POS** handles fast day-to-day selling (barcode, non-barcode and weight-based items), while the **ERP** keeps inventory, purchasing, party balances, accounting and financial reporting in one connected system. It is **ZATCA Phase-2 (FATOORA) compliant**, works **offline** at the till, and gives you live visibility from a **mobile app** wherever you are.

What you receive at a glance

- | | |
|--|--|
| ✓ Two stores live, ready to scale to more branches | ✓ Full accounting: P&L, Balance Sheet, cash & bank |
| ✓ Real-time stock, low-stock & expiry alerts | ✓ ZATCA Phase-2 e-invoicing (QR + XML) |
| ✓ Automatic reorder lists (PDF / Excel / WhatsApp) | ✓ Offline POS with automatic cloud sync |
| ✓ Customer & supplier ledgers with due collection | ✓ Owner mobile app & secure daily backups |

A live demonstration of the eight business scenarios you specified is included in Section 4, and our complete feature-availability response is in Section 3. Indicative pricing, ZATCA status and an implementation timeline follow. We would be glad to schedule a demo at your convenience.

We look forward to partnering with Evana Fresh.

Sincerely,

QTEC Solutions

2

Solution Overview

A single connected platform — the POS and the ERP share the same live database, so a sale at the till instantly updates stock, customer balances and the financial books.

POS & Sales

Barcode, non-barcode & weight-based selling. Cash, card, partial & credit. Returns, refunds, held bills. ZATCA e-invoice on every sale. Works offline.

Inventory & Buying

Real-time stock, min levels, low-stock & expiry alerts, valuation, auto-reorder, purchase entry/returns, price history.

ERP Finance

Customer/supplier ledgers, expenses, payroll, cash & bank, AR/AP, P&L, balance sheet — multi-branch & consolidated.

Architecture & access

Deployment	Cloud-hosted (SaaS) with secure, encrypted daily backups. Data residency in Saudi Arabia.
Offline capability	POS continues selling with no internet; transactions queue locally and auto-sync on reconnect.
Devices	Web browser (desktop POS & back-office), Android/iOS owner & reporting app, standard POS hardware.
Multi-branch	Central HQ view, per-branch operation, inter-branch stock transfers, consolidated reporting.
Security	Role-based access (owner, manager, accountant, cashier); full audit trail.
Compliance	ZATCA Phase-2 (FATOORA) e-invoicing — QR-coded simplified invoices & XML reporting; 15% VAT handling.

Standard POS hardware supported

- ✓

Barcode scanners (1D/2D)

✓

Electronic weighing scales (label & direct)

✓

Thermal receipt printers

✓

Cash drawers

✓

Customer-facing displays

✓

Label / barcode printers

Why QTEC for Evana Fresh

Grocery-specific workflows (weight items, expiry & near-expiry promotions, fast/slow/dead-stock), built-in ZATCA compliance, offline-first tills, and a platform that scales cleanly from 2 stores to many — without re-implementation.

3

Feature Availability — Response to RFQ

Status legend:

Included — Standard

available out of the box ·

Included — Configurable

set up to your rules during implementation.

Purchase returns	✓	Payroll & employee salary	✓
Purchase price history tracking	✓	Cash In / Cash Out & cash closing	✓
Supplier-wise purchase analysis	✓	Bank account management	✓
Purchase with partial payment	✓	AR, AP, P&L, Balance Sheet	✓
REPORTS & ANALYTICS	STATUS	MULTI-BRANCH & CLOUD	STATUS
Daily / Weekly / Monthly sales	✓	Multiple store management	✓
Product profitability	✓	Inter-branch stock transfers	✓
Best-selling & slow-moving	✓	Individual & consolidated reporting	✓
Branch-wise performance	✓	Mobile access, offline POS, auto-sync, backup	✓

Summary: 100% of the requested features are supported — the vast majority as standard, the remainder configured to your business rules during implementation.

4

Live Demonstration Plan

We will demonstrate each of the eight scenarios you requested, end-to-end, using realistic grocery data. An interactive wireframe of these screens accompanies this proposal.

#	SCENARIO	WHAT WE WILL SHOW
1	Purchase Entry with Partial Payment	Record a supplier bill, pay part now, balance auto-posts to the supplier ledger as Accounts Payable.
2	Product Sale with Customer Credit/Due	POS sale charged to a credit customer; invoice raised; balance added to their ledger.
3	Customer Due Collection	Collect a payment against outstanding due; receipt printed; remaining balance updated.
4	Low Stock Report	Items below minimum highlighted with one-click jump to reorder.
5	Near-Expiry Product Report	Batches by days-to-expiry, value-at-risk, and instant markdown promotion.
6	Reorder List Generation	Auto list from min levels + sales trend; export PDF/Excel; share to supplier on WhatsApp.
7	Complete Supplier Ledger	Purchases, payments, returns, running balance, ageing & statement.
8	Complete Customer Ledger	Credit sales, collections, running balance & statement.

5

Month-End Financial Insights

Every figure you asked to review at month-end is available on a single dashboard, drillable and exportable (illustrative values shown):

TOTAL SALES 487,200 SAR	TOTAL EXPENSES 38,400 SAR
PAYROLL EXPENSES 52,000 SAR	SUPPLIER PAYMENTS 310,000 SAR
ACCOUNTS RECEIVABLE 64,300 SAR	ACCOUNTS PAYABLE 121,500 SAR
INVENTORY VALUE 215,800 SAR	NET PROFIT 84,800 SAR

Plus full Profit & Loss Statement and Balance Sheet, per-branch and consolidated.

6

ZATCA Compliance Status

E-invoicing phase	ZATCA Phase-2 (Integration phase) — Compliant
Simplified tax invoices (B2C)	QR-coded, generated automatically at POS
Standard tax invoices (B2B)	XML (UBL 2.1) with required fields & cryptographic stamp
FATOORA integration	Device onboarding, clearance/reporting via ZATCA APIs
VAT	15% handling, VAT returns support, TRN on invoices
Data residency	Hosting within Saudi Arabia

7

Implementation Requirements & Timeline

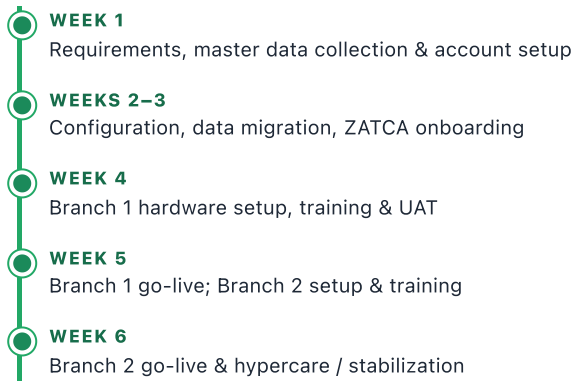

From Evana Fresh (to start)

- Product list / existing item data & barcodes
- Supplier & customer lists with opening balances
- Branch details & user roles
- VAT registration (TRN) & ZATCA credentials
- Internet at each store + POS hardware

Provided by QTEC

- Cloud setup, configuration & data migration
- ZATCA onboarding & integration
- On-site staff training (both stores)
- Go-live support & post-launch hypercare

Estimated timeline — approx. 6 weeks

8

Quotation

All amounts in Saudi Riyals (SAR), exclusive of 15% VAT unless stated. Indicative — confirmed after a short requirements workshop. Configuration assumes 2 branches and 3 POS terminals.

A · One-time implementation

ITEM	AMOUNT (SAR)
Implementation, configuration & master-data setup	9,500
Data migration (products, suppliers, customers, opening balances)	Included
ZATCA Phase-2 (FATOORA) onboarding & integration	2,500
On-site staff training — 2 branches	3,500
Project management & go-live hypercare	Included
One-time subtotal (excl. VAT)	15,500

B · Cloud subscription (billed annually)

ITEM	QTY	SAR / MONTH
ERP + POS platform — HQ, cloud hosting, daily backup, 1 branch	1	1,200
Additional branch license	1	450
POS terminal license	3	450
Owner mobile app & reporting	—	Included
ZATCA e-invoicing & updates	—	Included
Monthly subtotal (excl. VAT)		2,100
Annual subscription (×12, excl. VAT)		25,200

C · Year-1 total

One-time implementation (A)	15,500
Year-1 subscription (B)	25,200
Subtotal (excl. VAT)	40,700
VAT 15%	6,105
Year-1 total (incl. VAT)	46,805
From Year 2 onward (subscription + VAT)	28,980 / year

D · Optional POS hardware (per store, if required)

BUNDLE: SCANNER + SCALE INTEGRATION + THERMAL PRINTER + CASH DRAWER	≈ SAR / STORE
Supplied & configured (optional — you may use existing hardware)	4,200

Payment terms

- Implementation: 50% on signing, 30% on UAT, 20% on go-live
- Subscription: annual, in advance

Includes

- Updates, security patches & cloud backups
- Standard support (business hours) & ZATCA upkeep

9 Assumptions, Notes & Acceptance

Assumptions

- Pricing is indicative and confirmed after a brief requirements workshop; scope changes may affect totals.
- Configuration assumes two branches and three POS terminals; additional branches/terminals priced per the rate card above.
- Reliable internet is available at each store; offline POS bridges short outages.
- Customer provides clean master data for migration in an agreed format.
- ZATCA onboarding requires the customer's valid VAT registration and authorisation.
- Proposal valid for 30 days from the date shown.

Next steps

1. Schedule the live demo of the eight scenarios.
2. Short requirements workshop to confirm scope & final pricing.
3. Sign-off and project kick-off (≈ 6 weeks to full go-live).

Acceptance

To proceed, please sign below or reply to confirm. We will then arrange the demo and kick-off.
